Summer: P.O. Box 1837, Maggie Valley, NC 28751
828-926-3991

One of the purposes of FFGC is “furthering the education of our members and the public in the field of environmental awareness through the conservation of natural resources.” National Garden Clubs, Inc., Deep South Region and Florida Federation of Garden Clubs, Inc. are on the cutting edge when it comes to addressing environmental concerns. The Environmental Consultants' Council (ECC) of Florida is committed **to educate** in environmental studies in order to improve and maintain a highly qualified leadership; **to assist** with Environmental Study Schools in Florida and **to encourage** the organization of local environmental councils so they can provide continuing study in Florida. The ECC has recently adopted several projects including:

1. Promoting the use of fluorescent bulbs
2. The recycling of batteries.
3. Adoption of the low-flowing and dirty Hillsborough River, which is the source of drinking water for the City of Tampa.

The Council would also like to encourage everyone to become more aware of the issues and ramifications of Global Warming and to do everything they can to be part of the solution.

The Environmental Consultants' Council wants to encourage FFGC members from all the districts of the state to establish Environmental Study Schools and to enroll in the classes. Teddy Roosevelt would remind us that we did not inherit this land, we are holding it in trust for our children. We must be good stewards and protect it for them.

Do help FFGC to increase public awareness and activism on today's most important environmental issues. Become an Environmental Consultant!! [Environmental Consultants](#) in your area.
