What's New for 2022?

The mission of SEEK is to increase student environmental literacy through hands on and field based educational experiences. To inspire student interest and involvement in environmental conservation and protection; and to promote student development of environmental stewardship ethics as well as environmental career opportunities.

Some of the activities planned are field excursions and experiential activities at labs around the UF Campus. Students will visit a lab to understand the Florida aquifer and visit a spring location. A visit to the School of Forest Resources and Conservation to understand forest health and resilience as well as Florida's wetland ecosystems. The Honeybee Research Lab visit will review insects and impact of changing climates. Wrapping up the program will be a UF Panel to discuss Environmental Science Careers and offerings at UF.

Facilities: Dorm rooms with 4 attendees per 2 rooms sharing a private bathroom. All linens must be provided by the Attendee. A "what to pack" will be sent at time of final registration acceptance. Meals and transportation to labs will be provided. Presentations will be at various locations around campus and nearby UF locations.
